

3354
Aquavista Inc.

The Aquavista 100,

designed to look like a flat-screen LCD monitor, is a 2.4-gallon tabletop aquarium. Our tester, who has never even owned a goldfish, raved about its low-maintenance design.

"It's compact and easy to set up," she says. "And

you don't have to buy a bunch of intimidating components that can overwhelm an aquarium." It comes preassembled with overhead LED lighting, a wet-dry biological filtration system, a heater, an air pump, a submersible 3D background, an interchangeable picture frame and an aquarium stand. Can it get any easier?
