

## FISH CLOCK SET UP GUIDE

- 1) Select a location to hang your Fish Clock avoiding direct sunlight.
- 2) For drywall, use an anchor and screw with a minimum weight capacity of 30 lbs.
- 3) Add AA battery and set the time on the clock
- 4) Hang through the hole in the back of the Fish Clock. Make sure that the back locks in place and is secure.
- 5) Fill with treated water and add Betta fish after 48 hours.
- 6) To clean or change water, just slide the Fish Clock upward and remove from the wall.\*

Note: Do not house male betta fish with other betta fish, male or female.

\* It is recommended to make weekly water changes. Pour water away from

Betta Fish have the scientific name of *Betta splendens*, and are also known as Siamese Fighting Fish. The Betta is a beautiful pet with vibrant colors and fins that bring tranquility to any room.
