AQUARIUM

Your expensive tropical fish deserve a classier crib than a crummy old bowl. This 26 x 26-inch tank is a mere 4 inches thick, and comes in your choice of 15 wood or plastic frames. The heaters, lights, aeration, and pumps are controlled from an LCD panel on the side. A biological filtration system removes debris while naturally oxygenating the water. Now you can appreciate your exotic aquatics as the living art they are.
